Professional Experience

2025 – Present: Fullstack Developer and DevOps at Intricom Resources, remote

Fullstack development of the mobile app and backoffice of the mobile sanction system intricom (SSMI) for police forces across several autonomous communities (Balearic Islands, Murcia, and Galicia). As well as the company's online attendance control application. The latter in mobile, web, and backoffice variants.

Technologies: react, expo, helm, material-ui, nestjs, hasura, graphql, nodejs, docker, react testing library, deck.gl, WSL,

2024 – 2025: Frontend Developer and DevOps at Grupo MasMovil, remote

Development of the service management area for customers (ecare) for the companies of the MasOrange group (másmovil, yoigo, jazztel, etc.). As well as collaborating in deployment tasks and environment management.

Technologies: react, context, nx monorepo, kubernetes, helm, material-ui.

2022 – 2024: DevOps y desarrollador frontend in Ericsson, remote

In this position, I am dedicated to performing microservices migration tasks to docker and kubernetes platforms, migrating part of the company's infrastructure to Google Cloud Platform / bare metal to improve 5G network deployment internationally.

Technologies: kubernetes, helm, docker, jenkins, google cloud console, and internal tools , react js, nodejs, jest, react testing library, scss, tailwind, sonarqube, fetch API, spinnaker, jira.

2019 - 2021 R&D frontend developer in Kenmei Technologies, Paterna, Valencia

We developed a data visualization tool for telecommunications using react, redux, and deck.gl. Our main clients were Vodafone, Swisscom, Orange, O2, and másmovil. My main mission was to design, write, and test the software's UI/UX. Additionally, I also applied my Python knowledge in the Django backend.

Technologies: react js, nodejs, jest, scss, sonarqube, fetch API, google cloud console, docker, kubernetes, scrum master, jira, ansible, django, postman.

2016-2019 PROJECT LEADER IN LEXCONTROL, ALCÁZAR DE SAN JUAN, C.

R

Lead programmer and scrum master for the compliance management system for the company lexcontrol.es. We were a team of three developers, in which I wrote 85% of the frontend code and was responsible for providing support and system administration tasks required for the work.

Technologies: react js, jest, scss, blueprintjs, jira, fetch API, deck.gl, scrum master, firebase, postman, nodejs

2016 – 2019 Systems Administrator, Odoo Implementation at Grupo Criptana, s.l. Alcázar de San Juan, C.R

Implementation of the Open Source ERP Odoo using Python and system administration tasks, email systems, databases, file sharing, corporate website, etc. I also developed the construction management application in React, with a backend in Google Cloud Platform and React and React Native as frontend.

Technologies: Odoo, python, react js, scss, axios, scrum master, postman, nodejs, Ubuntu server, apache, php, mysql, firebase, samba, GCP, microsoft remote server, routers mikrotik, vpn.

2014 – 2017 Web Designer and System Administrator, Self-employed, remote

As a freelancer, during these years, I performed full stack development as well as system administration for the companies Roen Visual s.l., Molino Creativo, c.b., and creátikos, c.b. from Alcázar de San Juan and Campo de Criptana, as well as experiments with augmented reality and geolocation applications.

Technologies: Wordpress, react js, nodejs, unity (C#), css, scss, django, react native, jquery, bootstrap, Ubuntu server, apache, php, mysql.

2008-2012 Web Designer and System Administrator at TI53, S.L., remote

As a freelancer, during these years, I performed system administration tasks for the company TI53, s.l., managing the technological part of the day-to-day operations of the company.

Technologies: Windows server, Ubuntu server, apache, php, mysql, samba, prevengos, microsoft remote server, routers mikrotik, vpn, Apple server administration tools.
